SAMPLE / SYNTHETIC - FOR SOFTWARE DEMONSTRATION ONLY

Prior prescribed treatment history

Patient	Diego Martinez (fictional)
Date of birth	2012-04-17 (age 14 in this scenario)
Caregiver	Rosa Martinez
Sample identifier	DEMO-DM-014
Treatment start	2026-07-04

Record date: 2026-10-17. Patient: Diego Martinez, age 14.

Controller prescribed from 2026-07-04: budesonide/formoterol 160/4.5 mcg, two inhalations twice daily. This is a fictional existing prescription, not advice.

Rescue prescription: albuterol 90 mcg, two puffs as needed, as recorded in the fictional care plan. Prescription history does not prove adherence.

At the fictional review on 2026-10-17, the family asked about a clinician-proposed Dupixent review. No eligibility determination has been made.

Fictional patient: Diego Martinez, age 14. Caregiver: Rosa Martinez. Bergen County, NJ. No real clinician, insurer decision, member identifier or signature is represented. For software demonstration only; no clinical recommendation.
